Directions on every package

Miniature or Baby Zinnias	Large pkt.	.15
Mexican Miniature Zinnias	Large pkt.	.25
Fantasy or Chysanthemum Flowered Zinnia	Large pkt.	.15
Marigold, Dwarf French single	Large pkt.	.20

SWEET CORN

Sweet Orange sweet corn (yellow) is nearly as early as the smaller kinds, but it has 12 and frequently 14 rows of kernels. Ears are much larger than the Bantam corn. It makes a profitable market corn and is a favorite table corn as well. Height about 4 feet. Plant 3 feet apart each way.

Selected Seed, \$1.00 per quart; 60c per pint; 35c per half-pint

Mt. Shasta Sweet Corn. This is the largest and best corn in existence. Although it is a very large corn it possesses an unusually pleasing, sweet and delicious flavor of its own, found in no other corn.

Plant the Mt. Shasta as early as possible in rows 3½ feet apart and hills 3½ feet apart in the row. Allow only three stalks to a hill and if soil is weak only two stalks. Fertilize liberally when planting with poultry manure, placed not less than five inches from the seed.

Selected Seed, \$1.00 per quart; 60c per pint; 35c per half-pint

EVERBEARING STRAWBERRIES

Rhode Island. This new original strawberry is yet to be surpassed. A large rich red with fine flavor and a beautifully shaped pointed berry borne profusely and on good stems. Plants set as early as the ground will permit will produce a good crop the same season. A good shipper and good keeper.

1 doz. plants, 75c; 50 plants, \$2.00, postpaid.

The Mastodon. The Mastodon is called, by growers who have never grown the Rhode Island, the best everbearing berry. It is a very vigorous grower, sweet, nice flavor and has less acid than any everbearing berry. Last season, 1936, I picked large ripe berries from the Mastodon, November 10. It will produce a crop in the summer and another in the fall if allowed to. If the buds are picked off in the spring the fall crop will be larger.

25 plants, 50c; 75 plants, \$1.00
